

INTRODUCING THE Better Box

Interlocking
Design

Compostable

Crystal-Clear
Display

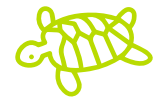

**Sustainability, strength, safety
and security: it's just Better.**

Our disposable, compostable Better Box Collection is made from premium-strength bamboo kraft and PLA, a plant-based bioplastic, helping you achieve your sustainability goals and operational excellence. The Better Box features a smart interlocking design and complementary tamper-evident seals to ensure your food travels safely and securely.

Furthermore, let our in-house design team help you customize your Better Box with bar codes, QR codes or other identifiers to strengthen traceability across your operations.

Did you know?

Recent studies have revealed marine plastic pollution is present in 100% of marine turtles. By 2050, there will be more plastic in our oceans than fish.

Fortunately, it doesn't have to be this way. The Better Box is made from 100% plants, not plastic. That means by choosing the Better Box, you're taking action against plastic pollution. Take it to the next level by composting this Better Box to replenish our soil with vital nutrients.

BETTER BOX COLLECTION

BAMBOO KRAFT BOX + WEDGE WITH PLA WINDOW
